Omor Faruk Rony

Front End developer | ReactJs | Next Js
Dhaka, Bangladesh

Summary

While studying Computer Science and Engineering, I decided
to pursue my passion for programming. I enrolled in a coding
bootcamp and learned full-stack web development. My favorite part
of programming is the problem-solving aspect—I love the feeling of
finally figuring out a solution to a tough problem.

My core stack includes React, Next.js, Node.js, and MongoDB. I'm
also experienced with TypeScript and Prisma. In addition to web
development, I've developed a strong interest and skill set in AI.
I've worked on several AI-related projects and enjoy exploring how
machine learning and AI can be integrated into modern applications.
I'm especially excited about the growing role of AI in software
development and constantly stay up-to-date with the latest trends
and tools in the space.

I'm always eager to learn new technologies and currently looking
for a full-time position as a software developer where I can continue
growing and contribute meaningfully to a team.

Outside of coding, I enjoy playing video games, watching movies,
and spending time with my dog. I also love learning new things—
lately, I've been diving into history and philosophy. I go to the gym
regularly and enjoy playing football as well.

_____

Experience

Fiverr
Freelance Web Developer
January 2021 - Present (4 years 4 months)
Provided high-quality web development services to various clients, specializing
in modern frontend technologies and responsive design
